Passionate and focused Software Engineer with over **3 years of professional experience** and **5 years of personal projects development**. Currently I work as a **Fullstack Developer** building end to end solutions. I'm looking to join a company where I can contribute to build high quality software. I would define myself as **proactive**, **team player** and **results oriented**.

WORK EXPERIENCE

November, 2023 - Currently | Mid Full-stack at Zennio | Toledo, Spain

- **Developed** and **maintained** enterprise applications using Angular, NestJs and Typescript, **with adherence to industry best practices** such as TDD, Clean Code, Smart/Dumb component architecture… **to increase development speed**, allowing the team **to deliver more features** than expected during the sprints.

- **Implemented** TDD on my team as the main testing methodology with Jest testing framework, implementing more than 900 unit tests in a system which had no tests, **decreasing the bug recovery time** from days to hours.

- **Mentored** Junior Developer about Angular and Typescript, declarative approaches and Reactivity with Signals and RxJs, **allowing him to work autonomously** and **allowing superiors to focus on other tasks**.

June, 2022 - November, 2023 | Junior Full-stack at Tribalyte Technologies | Madrid, Spain

- **Developed** and **Maintained** back office application with Angular and NestJs, implementing new features and solving bugs, **allowing my company to get revenue** from external clients, and **increasing the productivity of the paralegal department**.

- **Developed** 3 projects as one of the main responsibles for several clients, delivering them before the deadline: Battery monitoring and actuation system (React and NestJs), Chatbot to book guided visits (React, Firebase and DialogFlow) and Mobile access control system for scooters (React, NextJs, Firebase and Capacitor).

- **Streamlined** CI/CD pipelines, **reducing execution time** of Cypress E2E tests and Jest unit tests **by 75%** through parallelization, **enabling us to speed up the delivery process** of new features to our clients.

May, 2021 - April, 2022 | Junior Full-stack at Poddera | Madrid, Spain

- **Migrated** and **Refactored** old MVC application written in Java EE + JSP and Spring to an API REST and SPA Client with Angular to improve the user experience inside the application.

- **Maintained** and **Developed** dynamic form application written in Java EE and Spring framework.

- **Implemented** Devops practices such as unit testing, E2E testing, docker containerization and CI/CD, improving team performance.

EDUCATION

- **Double Degree in Software Engineering and Computer Engineering at University Rey Juan Carlos (URJC)** | September 2018 - March 2022 | Madrid, Spain

SIDE PROJECTS

January, 2024 - Currently | Trainix Reborn | Workout Scheduler

- **Description** - Trainix Reborn is a Fullstack web application built with React and NextJs. It aims to be a personal workout organizer that helps its users to schedule their workouts and keep track of the progress they have made at the moment.
- **Tech Stack** - **React, NextJs, TRPC, TailwindCSS, Next Auth, Prisma, Scss.**
- **Repository** - https://github.com/crisdegraciadev/trainix-reborn

LANGUAGES

- **Spanish** (native).
- **English** (B2 certified by Cambridge).

CERTIFICATIONS

- **Scrum Master Certified** by **theUncoding** (1852-169-167-3491)**.**
- **Redis Certified Developer** by **Redis University** (I'm currently studying it!)
